1. Introduction. Population aging is a global issue. One concern is a shortage of hospital beds, 1 making it necessary to provide more complex care to the elderly with chronic or comorbid health conditions while they are living at home. At the same time, an aging population also reduces the availability of family caregivers.

Spending refers to what is spent on healthcare in general. Thus, if people use more healthcare services, this causes spending to increase even if prices remain the same. Prices refer to what healthcare providers charge for particular services and products.; Costs refer to what healthcare providers spend in order to provide services and products to patients.
