The BMW 501, which began production in 1952, was the first car produced by BMW after World War II. It was powered by the 2.0 L (122 cu in) BMW M337 straight-six engine (p46) (based on the pre-war BMW M78 engine), which struggled with the 1,285 kg (2,833 lb) mass of the 501. The competing Mercedes-Benz W187 was powered by a larger 2.2 L (134 cu in) engine, which provided superior performance.

Technology. The bikes feature a new 1,649 cc (100.6 cu in) straight-six engine which is mounted transversely across the chassis. The cylinders are angled forward by 55°. The engine was originally used on the Concept 6, a concept bike that was shown at the 2009 EICMA Milan Motor Show. BMW claims that the engine, which at 560 mm (22 in) wide is just 67 mm (2.6 in) wider than the K1300 engine ...
