How to Winterize a Boat. When the sun sets on another boating season, it is time to get your boat ready for the cold winter months. Taking the necessary steps to winterize your boat will safeguard the vessel and its motor against the...

3 Ways to Winterize a Boat - wikiHow

An outboard motor is a propulsion system for boats, consisting of a self-contained unit that includes engine, gearbox and propeller or jet drive, designed to be affixed to the outside of the transom.They are the most common motorized method of propelling small watercraft. As well as providing propulsion, outboards provide steering control, as they are designed to pivot over their mountings and ...

Outboard motor - Wikipedia

A torpedo boat is a relatively small and fast naval ship designed to carry torpedoes into battle. The first designs rammed enemy ships with explosive spar torpedoes, and later designs launched self-propelled Whitehead torpedoes.They were created to counter battleships and other slow and heavily armed ships by using speed, agility, and the power of their torpedo weapons.
