In humans, the formation of body odors is caused by factors such as diet, gender, health, and medication, but the major contribution comes from bacterial activity on skin gland secretions. Humans have three types of sweat glands; eccrine sweat glands, apocrine sweat glands and sebaceous glands. Eccrine sweat glands are present from birth, while the two latter become activated during puberty.

Body odor - Wikipedia

By Dr. Mercola. Your body is designed for regular movement, but many Americans spend the bulk of their day sitting still instead. On average, a US adult spends nine to 10 hours each day sitting, 1 which is so much inactivity that even a 30- or 60-minute workout can't counteract its effects. 2 As Katy Bowman, a scientist Organ Damage and author of the book: *Move Your DNA: Restore Your Health* ...

Here's What Sitting for Long Periods of Time Does to Your Body

Oral ecology refers to the organisms that live in a mouth. Bacteria in biofilm were first detected under the microscopes of Antony van Leeuwenhoek in the 17th century. Various bacteria and saliva are two of the major components in oral microbiology, having the capability to be harmful, but also performing beneficial and necessary roles in the immune system.

A scientific model is a simplified abstract view of a complex reality. Scientific models are used as a basis for scientific work. They can be used to explain, predict, and test, or to develop computer programs or mathematical equations.. An example of a complex model is the software used for weather forecasts. The program is based on equations for the variables which affect weather.

Flaws in the Vegan Bible. The year 2006 marked an event that rocked the world of nutrition (as well as the walls of Whole Foods): the release of The China Study by T. Colin Campbell. Printed by a small publishing company known for other scientific masterpieces such as The Psychology of the Simpsons and You Do Not Talk About Fight Club, Campbell's book quickly hit the word-of-mouth circuit ...
