body structures and functions pdf

PART 1a: IMPAIRMENTS of BODY FUNCTIONS • Body functions are the physiological functions of body systems (including psychological functions). • Impairments are problems in body function as a significant deviation or loss. First Qualifier: Extent of impairments 0 No impairment means the person has no problem 1 Mild impairment means a problem that is present less than 25% of the time, with an ...

ICF Checklist revSep2003 - who.int

The human body is composed of elements including hydrogen, oxygen, carbon, calcium and phosphorus. These elements reside in trillions of cells and non-cellular components of the body. The adult male body is about 60% water for a total water content of some 42 litres. This is made up of about 19 litres of extracellular fluid including about 3.2 litres of blood plasma and about 8.4 litres of ...
