The Comac C919 is a narrow-body twinjet airliner developed by Chinese aerospace manufacturer Comac. The development programme was launched in 2008 and the aircraft's maiden flight was on 5 May 2017. Its first commercial deliveries are expected in 2021 to China Eastern Airlines. The aircraft is designed to carry 156 to 168 passengers in a normal operating configuration up to 5,555 km (3000 nmi).
