Individual Bonds A bond is an interest-bearing security that obligates the issuer to pay the bondholder a specified sum of money, usually at specific intervals (known as a coupon), and to repay the principal amount of the loan at maturity. Zero-coupon bonds pay both the imputed interest and the principal at maturity.

A bond index or bond market index is a method of measuring the value of a section of the bond market.It is computed from the prices of selected bonds (typically a weighted average).It is a tool used by investors and financial managers to describe the market, and to compare the return on specific investments.. An index is a mathematical construct, so it may not be invested in directly.

Bond market index - Wikipedia

The bond market (also debt market or credit market) is a financial market where participants can issue new debt, known as the primary market, or buy and sell debt securities, known as the secondary market.This is usually in the form of bonds, but it may include notes, bills, and so on.. Its primary goal is to provide long-term funding for public and private expenditures.
