Financial Accounting - tutorialspoint.com

Each financial transaction is recorded in at least two different nominal ledger accounts within the financial accounting system, so that the total debits equals the total credits in the general ledger, i.e. the accounts balance. This is a partial check that each and every transaction has been correctly recorded. The transaction is recorded as a "debit entry" (Dr) in one account, and a "credit ...

What is the difference between book depreciation and tax depreciation? Generally, the difference involves the "timing" of the depreciation expense on a company's financial statements versus the depreciation expense on the company's income tax return. The depreciation expense in each year will be different, but the total of all of the years' depreciation expense associated with a specific asset ...

What is the difference between book depreciation and tax

For a company, share capital is the main source of fund. So, when company gets share capital, it is very necessary to record it in the books. To know basics of accounting for share capital transactions is still important for every accountant because today most of companies are limited by shares. Every shareholder's liability is limited up to his bought shares.
