History. Breguet recommended the use of reduced-section conductors to protect telegraph stations from lightning strikes; by melting, the smaller wires would protect apparatus and wiring inside the building. A variety of wire or foil fusible elements were in use to protect telegraph cables and lighting installations as early as 1864. A fuse was patented by Thomas Edison in 1890 as part of his ...

There's a plug board under the cowling at the bottom of the windscreen, drivers side, it might connect there to go to the engine bay. What I've done in the past is to use a length of wire with a multimeter to test continuity, the wire is just for length so you could connect the wire at the relay and run it out to the maf then test it with the multimeter.
